**The Company's achievements have been recognized by the industry on multiple occasions.**

**15 M+**

end users

**160+**

cities

**10 000+**

employees

**7-TIMES**

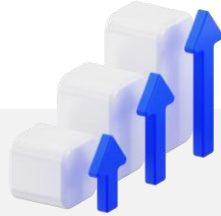

increase in revenue in 2021

# BANKING SECTOR

Today the boundaries between many industries are blurring, and it is impossible to tell the difference between financial and technology industries precisely. There is a new business emerging, the one that produces a hybrid product "at the junction"...

In this reality Russian banks appeared to be the most digitally advanced in the digital world.

## As confirmed by [Deloitte's global survey](#)

According to its results Russian banks entered the world top 10. Analysts noted that Russian banks outperform the global average in five out of six stages of customer interaction that include customer acquisition, customer onboarding, payment execution and management, cross-sales, and bank cards usage.

## MAJOR INDUSTRY TRENDS

Traffic redistribution

Business processes automation

Artificial Intelligence implementation

Digital service transformation

Cyber-security

# EXPERTISE

Design and development of high-tech software aimed at digital banking business support

Improving business process efficiency with machine learning and artificial intelligence

Design and development of highly loaded omnichannel solutions

Delivery, technical support, and managed services for complex digital solutions

Design and implementation of Big Data solutions

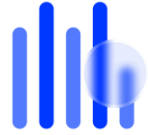

IT and digital transformation consulting

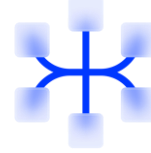

## Complex data Platform

- Enterprise Data Warehouses with real-time and near-real-time data synchronization
- Virtualization and federation of different data sources, single interface to access all data via SQL-queries

## Data Lakes and Factories

- Central hub for enterprise data
- Capability to set up and close a sandbox for pilot projects and statistical hypothesis tests
- All analytical tools operate in a single environment

## Machine Learning and Artificial Intelligence

- Distributed machine learning based on Spark
- Capability to efficiently operate data models in an SQL environment via built-in MADlib functions
- Support for R, Python, and Apache MADlib

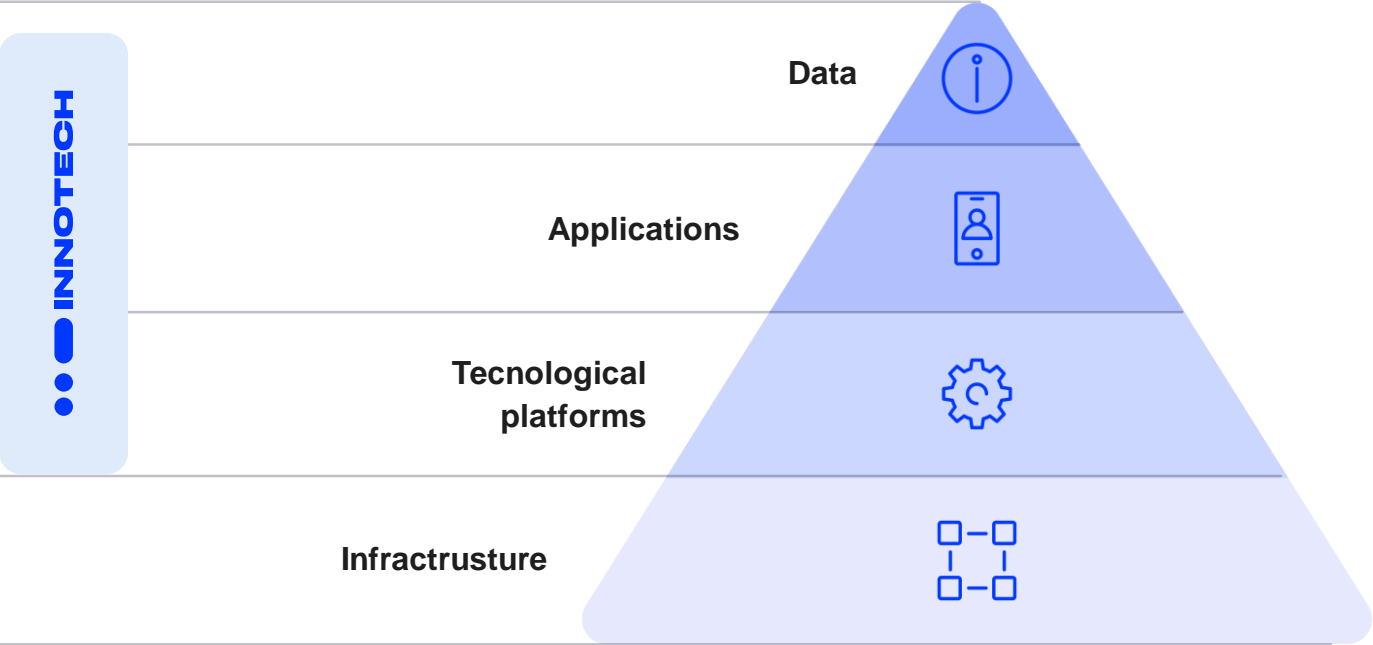

## Open-alternative to proprietary data platforms

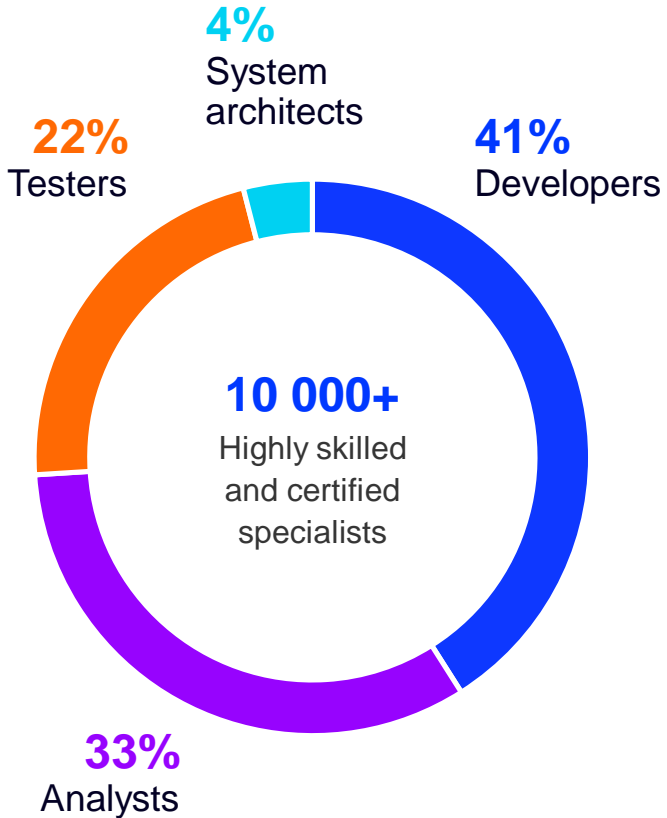

- Open-source alternative based on Arenadata DB and Arenadata QuickMarts, databases with the parallel data processing engine at the core
- Transparent approach to data migration and risk mitigation
- TCO optimization

# PRODUCTS AND SERVICES

Innotech offers a wide range of IT solutions. This includes cutting-edge integrated multi-component projects for product development and sales. We also execute data processing projects involving service, platform and infrastructure solutions.

We carry out custom-made technological projects of any complexity

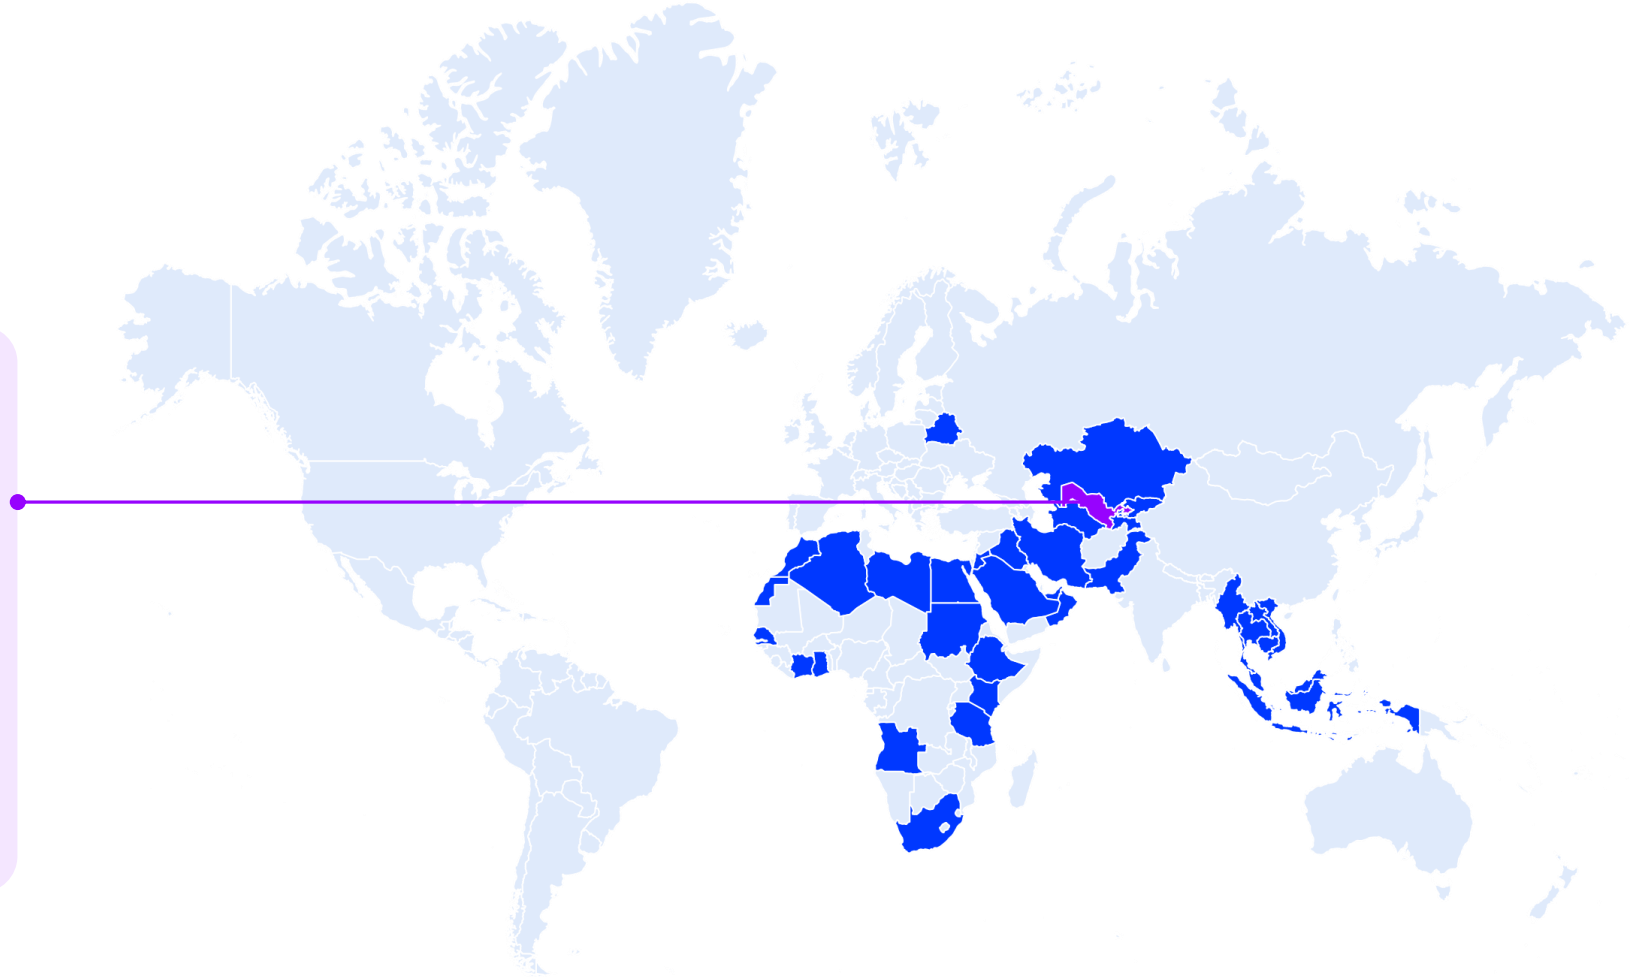

# TARGET REGIONS

Innotech actively forges partnerships on the global market: **South-East Asia, the Middle East, and Africa.**

## Our projects in Uzbekistan:

- Export of demanded IT solutions (e.g. software, Big Data)
- Educational courses with Uzcard – Key Payment Uzbek operator
- Acceleration program «Startup bridge» for young entrepreneurs
- Advanced courses for the Bank of Uzbekistan
